

Canon

imageRUNNER C2880

Our Favorite Feature:

Device Management and Security Features – The Color imageRUNNER C2880 Series offers a host of device management features that ease administrator / user burdens associated with installing, monitoring, and managing Canon and third-party print devices on corporate networks. Canon provides peace of mind through a number of security features and options, such as Encrypted PDF and Digital Device Signature, which enables the recipient to verify which device scanned the document. Canon also offers hard drive security options, which allow users dealing with sensitive information to protect the hard disk drive (HDD) content through HDD Complete Erase and HDD Data Encryption. The new HDD Encryption Kit is Common Criteria Certified. In addition, accessibility accessories, such as the new Voice Operation Kit, Remote Operator's Software Kit and ADF Access Handle provide better device access for disabled persons.
